GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

- "Information Pertaining to Water Rights in California"
- "Water Rights for Stockponds Constructed Prior to 1969"
- "Appropriation of Water in California"

TO WHOM IT MAY CONCERN,

I, Harmon W. Porteous, being of sound mind, voluntarily testify that for the past 65 years and longer I have personal knowledge that the water rights to the property on Campo Flores Creek, Calaveras County, California, owned since 1945 by James M. and Dorothy E. Marquis and presently known as the Marquis Ranch, are on this same Campo Flores Creek and furthermore that the water from this source has been used continuously during this period for irrigation, stock, garden, household mine and mill operation on this property.

I was born October 4, 1890, near West Point, Calaveras County, California not far from the Marquis Ranch and I clearly remember that as a boy I ran cattle all through this country and was frequently in and around the property herein mentioned and remember the ditch which carried the water from Campo Flores Creek to the property. I also recall that this property for many years was the only patented ground in the area. I have known each of the various owners and/or tenants residing on this property for the past 65 years or more and recall the water originally was carried in a ditch. I distinctly remember when the existing 2" pipe was laid in this original ditch to carry the flow from Campo Flores Creek to what is now the Marquis Ranch.

I have personally known the above James M. and Dorothy E. Marquis since they purchased the above property in 1945 and can testify that like the previous owners and/or tenants whom I have known since before 1904 they also have continuously exercised their deeded water rights on this Campo Flores Creek and that at this time this water is their only source of supply for all purposes; irrigation, gardening, stock, household, etc.

INDIVIDUAL ACKNOWLEDGMENT
